For around 4 thousand years civilizations have been celebrating the new year. Did you know Rome started the 12 month calendar and soon January 1st became the official new year under Julius Ceasar's rule in 46 B.C.

IS GOING HOME

I was very weak after breakfast one day and could not get up, so went to the hospital. I spent a week there, not sure what all went on with my health but I feel great now and my blood pressure is better than it ever has been! Rehab at Prairie Vista Village was great, I spent about two weeks there and they worked with me every day.
